

APART-USA – Contact Information

The OeAW's APART-USA funding program supports outstanding post-docs who work at a university or non-university research institution in the USA and would like to relocate their scientific activities to excellent research locations in Austria against the background of the current changes in the US research landscape. The universities and non-university research institutions listed in the overview below are eligible for nomination.

Post-docs interested in funding are asked to contact the research institution directly where they would like to work funded by the APART-USA fellowship.

Please note that the decision on a possible nomination for the fellowship is made by the research institution. The OeAW has no influence on this decision.
