

# FELLOWSHIP RATES 2026

for the programs

DOC

Post-DocTrack

APART-GSK

DOC, Post-DocTrack and APART-GSK fellowships can be conducted

- by means of an employment contract at a university or a research institution in Austria or
- self-employed (“Neuer Selbständige:r”).

The following table shows the fellowship rates that apply to approvals in 2026:

Program	Amount of fellowship per year (Euro)
DOC	52.080
Post-DocTrack	52.080
APART-GSK	91.776

These amounts are personnel costs and they are super gross sums.

That means these amounts include all legally required taxes and non-wage labor costs as well as the employer’s contribution in case of employment.

The respective extent of employment depends on the collective agreement or company agreement of the university or research institution; as a rule, full-time employment is not possible.

**PLEASE NOTE:** The amounts will not be increased during the funding period; this is also true for fellowships that run for several years.
