

FELLOWSHIP RATES 2025

for the programs

DOC

Post-DocTrack

APART-MINT und APART-GSK

DOC, Post-DocTrack, APART-GSK and APART-MINT fellowships can be conducted by means of an employment contract at a university or a research institution in Austria or as a "new self-employed" ("Neue:r Selbständige:r").

The following table shows the fellowship rates that apply to approvals in 2025. These amounts are personnel costs.

Program	Amount of the fellowship per year
DOC	50.568
Post-DocTrack	50.568
APART-MINT	89.100
APART-GSK	89.100

The amounts stated above are super gross sums and include all legally required taxes and non-wage labor costs (including the employer's contribution in case of employment).

The respective extent of employment depends on the collective agreements or company agreements of the respective university or research institution; as a rule, full-time employment is not possible.

PLEASE NOTE: For fellowships that run for several years, the amounts will not be increased during the funding period.
